Chemical pest management practices

"If non-chemical methods are ineffective, the school district will consider pesticides only after careful monitoring indicates that they are needed. According to pre-established action levels Only as a last resort will we use pesticide and promise to select effective formulations that pose the least possible hazard and are effective in a manner that minimizes risks to people, property and the environment. WJUSD is committed to an open dialog with all of our sites and community. To protect our students' developing brains and bodies, we will go beyond the minimal standards set by the state to cross-check the regulatory status of chemicals in other countries and consult the peer-reviewed literature about any unfolding concerns about approved chemicals. If any of the chemicals on our pesticides list are to be used, WJUSD will work with our applicators to facilitate electronic notifications to all guardians, teachers, and school staff. Applicators will physically flag areas to be treated at least 72 hours prior to application, and we will leave those flags until the chemicals have dissipated

This school district expects the following pesticides (pesticide products and active ingredients) to be applied during the year. (This list includes pesticides that will be applied by school district staff or licensed pest control businesses.): See Attached Documents

Healthy Schools Act

- This school district complies with the notification, posting, recordkeeping, and all other requirements of the Healthy Schools Act. (Education Code Sections 17608 - 17613, 48980.3; Food & Agricultural Code Sections 13180 - 13188)

Training

Every year school district employees who make pesticide applications receive the following training prior to pesticide use:

- Pesticide specific safety training (Title 3 California Code of Regulations 6724)
- School IPM training course approved by the Department of Pesticide Regulation (Education Code Section 16714; Food & Agricultural Code Section 13186.5).

Submittal of pesticide use reports

- Reports of all pesticides applied by school district staff during the calendar year, except pesticides exempt¹ from HSA recordkeeping, are submitted to the Department of Pesticide Regulation at least annually, by January 30 of the following year, using the form provided at www.cdpr.ca.gov/schoolipm. (Education Code Section 16711)

Notification

This school district has made this IPM plan publicly available by the following methods (check at least one):
